

GLOBAL PAKISTAN (PVT.) LTD.
An ISO Certified Company
CNG & High Pressure System Specialists

www.globalcng.com

PRESS RELEASE 23-07-08

Due to the mounting prices of oil world over, CNG has become the most preferable and viable alternative fuel vehicle for Pakistan. Due to the increasing usage of this alternative fuel, Pakistan is rated as No. 1 in Asia and 3rd in the world. Suppliers and manufacturers of CNG related products are challenged to ensure the durability and safety of CNG operations in the country. Since CNG filling stations comprise of complex systems with high pressures and explosive threats involved, fully trained and expert operators are required to run and maintain the safety operations.

Global Pakistan is the pioneer company in providing CNG related products and technical expertise since 1994. In order to serve the national interest TEVTA Punjab today has signed an agreement with Global Pakistan for the launch of a CNG Technical Training institute for CNG Operators and Supervisors. The course is designed, keeping international standards of safety applications in consideration. The trained personals will ensure a safe operation of CNG industry in Pakistan.
